

PROFESSIONAL IT JOB DESCRIPTIONS

Java Developer • QA Engineer • Python Developer

Role : Java Developer

Company : ABC Technologies

Department	Engineering / Software Development
Location	Bangalore / Hybrid
Employment Type	Full-time
Experience	0–2 years (Freshers can apply)
Qualification	BE/BTech/BSc/MCA in Computer Science, Information Technology, or a related field.
Salary Range	₹3.5–6 LPA, depending on skills, interview performance, and experience.
Notice Period	Immediate joiners preferred; candidates with a notice period of up to 30 days may also apply.

About Us

ABC Technologies builds scalable enterprise software solutions for recruitment and talent management. We help companies streamline hiring with smart ATS, interview automation, and candidate analytics platforms. Join our engineering team to work on products that impact HR teams and job seekers across India and globally.

Job Summary

We are looking for a motivated Java Developer to join our software development team. The candidate will contribute to developing, testing, debugging, and maintaining Java-based applications and backend services while collaborating with developers, QA engineers, and other stakeholders.

Key Responsibilities

- Develop, test and maintain Java applications and backend services.
- Write clean, reusable, efficient, and maintainable code.
- Participate in debugging and resolving software issues.
- Work with databases, REST APIs, and application integrations.
- Collaborate with developers, QA engineers, product teams, and other stakeholders.
- Participate in code reviews, testing, and Agile development activities.
- Document technical processes and application changes when required.

Required Skills

- Core Java fundamentals and OOP concepts.
- Basic SQL and database knowledge.
- Understanding of REST APIs and web application concepts.
- Basic Git/GitHub knowledge.
- Problem-solving, debugging, communication, and teamwork skills.

Good-to-Have Skills

- Spring Boot, Hibernate/JPA, or Microservices.
- Basic AWS or other cloud-platform knowledge.
- Agile/Scrum methodology.
- Exposure to unit testing and CI/CD.

Benefits

- Health Insurance + Wellness benefits
- Learning & Certification support
- Flexible/Hybrid work options
- Growth-oriented engineering culture

Application Process

Submit an updated resume through the company careers portal or recruitment team. Shortlisted candidates will proceed through the relevant assessment/interview stages, followed by technical and HR discussions as applicable.

Role : QA Engineer

Company : ABC Technologies

Department	Quality Assurance / Engineering
Location	Bangalore / Hybrid
Employment Type	Full-time
Experience	0–2 years (Freshers can apply)
Qualification	BE/BTech/BSc/MCA in Computer Science, Information Technology, or a related field.
Salary Range	₹3–5.5 LPA, depending on skills, interview performance, and experience.
Notice Period	Immediate joiners preferred; candidates with a notice period of up to 30 days may also apply.

About Us

ABC Technologies builds scalable enterprise software solutions that power modern hiring. We believe quality is everyone’s responsibility. Join our engineering team to build and test products that help companies find the right talent, and help candidates find the right jobs.

Job Summary

We are looking for a detail-oriented QA Engineer to ensure the quality, reliability, usability, and performance of software applications. The candidate will design and execute tests, identify and document defects, verify fixes, and collaborate closely with development and business teams.

Key Responsibilities

- Understand business and technical requirements and prepare test scenarios.
- Create, execute, and maintain test cases and test data.
- Perform functional, regression, integration, usability, and exploratory testing.
- Re-test resolved defects and verify fixes across relevant environments.
- Collaborate with developers, product teams, and business stakeholders.
- Maintain testing documentation, test reports, and quality metrics.
- Participate in Agile/Scrum ceremonies and continuous improvement activities.

Required Skills

- Understanding of software testing fundamentals, SDLC, and STLC.
- Manual testing and test-case preparation.
- Knowledge of bug reporting and the defect lifecycle.
- Basic SQL/database knowledge.
- Basic understanding of API testing.
- Strong analytical, attention-to-detail, communication, and teamwork skills.

Good-to-Have Skills

- Selenium or another automation testing tool.
- Postman and API testing.
- Python or Java basics.
- Jira or other defect-management tools.
- Basic CI/CD and Agile methodology knowledge.

Benefits

-  Health Insurance + Wellness benefits
-  Learning & Certification support
-  Flexible/Hybrid work options
-  Growth-oriented engineering culture

Application Process

Submit an updated resume through the company careers portal or recruitment team. Shortlisted candidates will proceed through the relevant assessment/interview stages, followed by technical and HR discussions as applicable.

Role : Python Developer

Company : ABC Technologies

Department	Engineering / Software Development
Location	Bangalore / Hybrid
Employment Type	Full-time
Experience	0–2 years (Freshers can apply)
Qualification	BE/BTech/BSc/MCA in Computer Science, Information Technology, or a related field.
Salary Range	₹3.5–6 LPA, depending on skills, interview performance, and experience.
Notice Period	Immediate joiners preferred; candidates with a notice period of up to 30 days may also apply.

About Us

ABC Technologies builds scalable enterprise software solutions for recruitment and talent management. We use Python, data engineering, and AI to power smarter hiring decisions. Join our engineering team to work on products that impact how companies hire and how candidates get discovered.

Job Summary

We are looking for a Python Developer to join our software development team. The candidate will contribute to developing, testing, integrating, and maintaining Python-based applications and services while working collaboratively with development, QA, and cross-functional teams.

Key Responsibilities

- Develop and maintain applications using Python.
- Write clean, scalable, testable, and maintainable code.
- Debug applications and resolve technical issues.
- Develop and integrate REST APIs and application services.
- Work with relational and NoSQL databases.
- Write unit tests and participate in code reviews.
- Collaborate with QA engineers and cross-functional stakeholders.
- Document development processes, technical decisions, and application changes.

Required Skills

- Strong understanding of Python fundamentals and OOP concepts.
- Basic SQL and database knowledge.
- Understanding of REST APIs.
- Basic Git/GitHub knowledge.
- Problem-solving, debugging, communication, and teamwork skills.

Good-to-Have Skills

- Django, Flask, or FastAPI.
- MongoDB.
- Pandas and NumPy.
- AWS or another cloud platform.
- Docker and basic CI/CD knowledge.

Benefits

-  Health Insurance + Wellness benefits
-  Learning & Certification support
-  Flexible/Hybrid work options
-  Growth-oriented engineering culture

Application Process

Submit an updated resume through the company careers portal or recruitment team. Shortlisted candidates will proceed through the relevant assessment/interview stages, followed by technical and HR discussions as applicable.
